The world's finest coffee proudly roasted in the UK by

The Ambassador is our flagship professional "bean to cup machine" machine hand built by special order in Switzerland. This really is the ultimate automatic machine, ideal for establishments where style is just as important as great coffee! Machined from stainless steel and aircraft grade aluminium, it will produce in excess of 400 drinks per drinks day with 20 different programmed coffee selections and auto cleaning cycles. Equipped with large bean hoppers and inbuilt fridge, this machine will effortlessly produce over £700 per day in coffee sales....if you've got the establishment we've got the machine!

The Ambassador - Flagship

Questions....

1. How quickly can I have the machine fitted?
Once we receive your deposit payment by credit card and you have returned your rental documents to our rental company we can normally install the machine within 7 working days.
2. Do I need to install water and electricity to the machine?
*The Ambassador needed to be plumbed. We require a standard "washing machine ¾" fitting within 1 metre of the machine. We also require **two** 13amp standard plugs.*
3. What happens if the machine breaks down?
We include a 12-month service plan (this does not include faults relating to non-cleaning of the machine)
4. How do I get my monthly coffee allowance?
Your monthly coffee allowance is delivered to you by business post, or deducted from your monthly coffee invoice. All additional coffee orders are made via your account manager (lo-call rate) 0844 477 85 68
5. Where can I buy cleaning products for my coffee machine?
Please order via your account manager (lo-call rate) 0844 477 85 68
6. Do I get training on how to make coffee?!
You sure do! Our enthusiastic engineers will give you training on how to make great coffee, we do however, offer more advanced group training sessions covering latte art to a building the ultimate coffee based drinks
7. Why do I need water decalcifying unit and meter?
All our coffee machines come with a decalcifying unit as it protects the machine from hard water scale build up and makes the coffee taste great! We do not provide warranty on machines without a decalcifying unit. We install 10,000 litre units as standard. Depending on the usage of your machine this should need refreshing every 6-12 months. Our agents European Water will contact you twice yearly and take a water metre reading, this will determine when a refresh is needed and is not included within your monthly rental.

The small print! – All equipment supplied is brand new and comes with one-year warranty, unless stated all prices are fixed for three years and will not increase within this term. Delivery upon completed documentation is 14 working days, the Off Set Coffee rental plan is based on the supply of Paddy & Scott's Café Classic Coffee
